-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1711

The claims contain numerous instances of words with missing letters such as "kn adding" (sic, kneading)" in claim 1 etc. Corection is required. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mori et al. (WO 03/014174).

It is noted that Mori WO '74 corresponds to 2004/0204537 which is the US national stage application of Mori WO '74 and the two documents are therefore presumable identical except for language. Therefore reference will be made to Mori US 2004/0204537

Mori discloses a composition which is an grafted "olefin based copolymer" abstract such as a copolymer of ethylene and vinylcyclohexane (paragraph 34). Use of peroxides are disclosed in paragraph 47. No examples exist of grafting of ethylene vinylcyclohexane with applicants monomers but choice of such would have been obvious to a practitioner having an ordinary skill in the art at the time of the invention in the expectation of adequate results, absent any showing of surprising or unexpected results.

Art Unit: 1711

Applicant cannot rely upon the foreign priority papers to overcome this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15.

Mani et al. (STN AN :1993 :449973, 1993), cited of interest is the closest prior art pending applicants perfection of priority. However, Mani contains no teaching or suggestion of a process utilizing applicant components "B" and "C".
